Welcome to RISEKIDS

RISEKIDS brings together the best of local and international learning to meeting the needs of the next generation of learners.

A Play and Fun Based Approach

We believe a child does not need to learn to play, but a child does need to play to learn. Play is recognized as key to early learning and it is how children learn to make sense of the world.

We have created fun and structured learning experiences that inspires and motivates young children to want to learn everyday.

We have created an atmosphere that inspires and motivates young children to be better prepared for formal schooling.

Love of Learning

The challenge in early education is to ensure that we instill in our children a simple but crucial desire that inspires them to love to learn. At RISEKIDS we inspire learning by creating fun experiences and developing a 'Love of Learning' in the child as early as possible.

The RISEKIDS pre-k program provides an innovative mix of teacher-led and self-initiated activities. We build in opportunities for the child to master skills and gain increasing control and improved ability through play. This in turn builds confidence and encourages young learners to become more independent and instill from an early age a desire to explore to learn.

Solving the Pre-School Parent Dilemma

At RISEKIDS we understand the stresses and strains which parents feel when making the right education choice for their children. We understand that in today's highly competitive environment, high grades are not always enough to ensure that children succeed.

At RISEKIDS we also recognise that children need to be moulded into individuals with deep-rooted self-confidence, a clear grasp of educational fundamentals and interpersonal and leadership skills.

RISEKIDS has been created to help parents, full of aspirations and dreams for their children, to resolve the dilemma of choosing the right type of learning environment to suit the needs of their children.

Learning

Skills

Goals

Our learning environment is different from typical pre-schools, promoting a hands-on approach that engages and motivates learners.

We combine a blend of teacher and technology-led tuition that uses internationally acclaimed content.

We focus on high levels of child interactivity, participation and team work allowing children to develop skills such as communication, creativity and self-expression.

All of our activities and modules are designed to achieve a clear learning outcome and highly engaged enthusiastic learners.

Classroom Environment

Core to the RISEKIDS concept is the creation of dynamic, stimulating and fun learning environment. The RISEKIDS environment are carefully zoned with Book, Technology and Construction zones. There is also a dramatic Play Zone complete with a market place, doctor's space, clothes and accessories where children can spend hours and give flight to their imagination.

State of the art learning system and carefully designed environment to support teaching and learning.

The carefully planned use of technology helps the child to learn in relevant, real world context with inspiring and engaging content.

RISEKIDS has created a warm and stress free atmosphere where students thrive.

Learning Environment

Physical Environment

Easy access to quality learning tools, technologies, resources and group play.

Technology Environment

The Carefully planned use of technology helps the child to learn in relevant, real world context with inspiring and engaging content.

Health & Safety

Every parent needs the reassurance that their child is within a safe and secure environment. RISEKIDS centres do not compromise on the child's health and safety when they are in our care.

Program Pillars: Creating A I

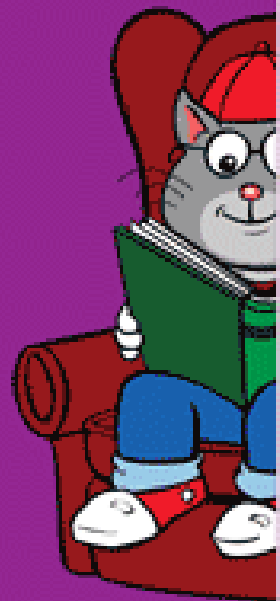

The RISEKIDS program has been uniquely structured around a centre setting and learning experience.

Environment:
The RISEKIDS Pre-School is characterised by a fun and inspiring atmosphere that encourages a child's natural curiosity. Different play zones, such as the Book Zone, the Science Zone and the Fun Zone have been incorporated into the classroom.

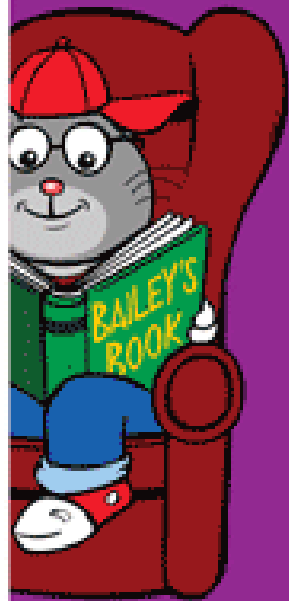

Leading Global Learning:
The RISEKIDS content and curriculum is a tailor-made blend of international and local learning content designed to stimulate the minds of young learners.

Teaching:
Our teachers have a passion for learning! Intensive training programs ensure that teachers are kept abreast of the latest developments in education, new teaching styles and content. A low student teacher ratio ensures optimal student learning.

A New Learning Experience

and six program pillars to create an engaging and stimulating

Technology:
RISEKIDS classes use state-of-the-art interactive technology. This, combined with hands-on manipulatives, enables RISEKIDS pupils to develop early familiarity and confidence with technology and resources.

Instructional model:

At RISEKIDS we believe that every child has the potential to become a competent learner provided the right tools and methodology are adopted. We provide this platform by adopting the Understand, Do, Think, Feel approach.

Curriculum and Content:

Based around high quality, our age-appropriate content is developed by international and local educators. A highly engaging curriculum with focus on core skill development in early language and numeracy.

Our Learning Goals

At RISEKIDS we focus on six key learning goals for the child

Social and Emotional Development

The first few weeks in our RISEKIDS Pre-School are devoted to the socialisation process. For young children, leaving their home comfort zone can be a daunting challenge. Our teachers are trained to help children make this transition. We plan activities and tasks that help children take charge of their needs. Values such as tolerance, respect for self and others are implicit in our program in keeping with the social fabric and cultural diversity of India.

We achieve this curriculum goal by teaching children

- How to take turns – sharing play equipment
- Express needs and wants – asking for help or assistance from peers and teachers
- Learn to care for their environment
- Become independent

Motor Skills Development

Childhood is the critical time to develop the fine and gross motor muscles.

The development of fine motor skills in children will enable them to perform a variety of important functional tasks. These are simple everyday, functional activities that will follow them through their entire life.

The exercises of practical life activities that we have introduced at every stage encourage development of hand-eye coordination and small muscle control.

A child who has been exposed to these activities will have no difficulty in using everyday tools like pencils and brushes.

At RISEKIDS we believe that every child is a competent learner.

Early Literacy and Language Development

Children learn to talk because they have a powerful motivation to communicate with people. They learn language by observing and copying and also by speaking with others as they attempt to make sense of their world.

At RISEKIDS our approach offers children opportunities to build upon their language capabilities whilst communicating for real purposes. They are encouraged to express their ideas and experiment with language which leads to the understanding of how spoken and written language are related.

To build their confidence, we allow the use of both mother tongue and English initially, but gradually allow children to acquire the confidence to use language, both naturally and consciously. This happens because all our language development activities use both languages as supportive pillars.

Early Numeracy Development

At RISEKIDS we focus on preparing a child to understand abstract concepts by leading them from the known to the unknown. This starts with activities like sorting and matching, leading on to making connections between numerals and quantity. Children gradually learn how to use numbers and counting in play, eventually recognising and using numbers reliably, to develop mathematical ideas and to solve problems.

Some activities to develop early math concepts are

- Sorting and classifying
- Counting using manipulatives and toys
- Patterning
- Comparing and contrasting
- Adding and subtracting
- Activities on shape, space and measures
- Maths in real life

Developing Knowledge & Understanding of their World

Risekids pre-schools follow a thematic curriculum. The themes have been chosen with great care and we have kept in mind that all themes should be relevant to a child and reflect his experiences and world. This enables them to make 'connections' between what they learn and the real world. Our collaborative learning opportunities encourage young learners to show empathy, compassion and respect for the needs and feelings of others. They learn to care and share.

Developing Creativity and Self-Expression

At RISEKIDS we believe that self-expression is fundamental. If children are given avenues to express themselves through song, dance, rhyme and dramatic play, this enhances their communication skills, helps them gain confidence and helps to develop their core values.

Art and Aesthetics play a key role in RISEKIDS Pre-School. The creative arts are integrated across the curriculum and it gives children opportunities to appreciate beauty in simple everyday things.
